

Oval Pools

Figure 1

Record all measurements in the MEASURING FORM.

Measure Diagonals

For a OVAL pool, you will need to measure the pool on the diagonals (#1 and #2). Refer to Figure 3 to locate the diagonals. Remember to use the bead receiver (pool edge) as the reference point. The diagonals are often overlooked, but they are important because few pools are perfectly square. There can be a substantial difference end-to-end in a pool, and that needs to be noted if a liner is to fit properly. (The Computer Aided Design System that engineers your liner can adjust for out of square pools.)

Measure the diagonals from the where the oval ends meet the straight sides of the wall. Note that this might not be where the shallow end starts.

Record all measurements in the MEASURING FORM.

Measure the Width (A) and the Length (B)

Referring to the illustration of your oval pool (figure 1), be sure that the width (A) and the length (B) measurements are made at the bead receiver (where the liner snaps into the track), not at the edge of the coping (the edge of the pool deck). See figure 2.

Figure 2

Figure 3

Horizontal Measurements of Pool Bottom and Depth Measurements

Choose the bottom contour of your pool from the illustration shown in Figure 5 to determine which measurements you will need to take. You will also specify this on the MEASURING FORM.

Figure 5

Quick Check Of Your Measurements

L+M+N+E must equal B for a Standard Hopper

(B is the length of pool taken in Step #2)

L+N must equal B for a Wedge

(B is the length of pool taken in Step #2)

E1+L+M+N+E must equal B for a Sport End

(B is the length of pool taken in Step #2)

L+M+N+E +EL must equal B for a Safety Ledge

(B is the length of pool taken in Step #2)

G+H+I must equal A for Standard Hopper and Wedge

(A is the width of pool taken in Step #2)

SL+G + H + I + SL must equal A for Safety Ledge

(A is the width of pool taken in Step #2)

Vinyl-Covered Step Sections

If your pool has a built-in step section that is covered with vinyl, you must complete the Vinyl Covered Step Section of the MEASURING FORM.

Wall Seam Placement (pools with steps)

By default, the wall seam placement is in the center of the shallow end. However if your pool has a step located at a different location (side of pool, left or right of shallow end) then the wall seam should be placed in the center of the step. Indicate on the measuring form where the seam should be located if other than center shallow end.

Name: _____

Address: _____

City: _____ **State/Prov:** _____ **Zip/Postal Code:** _____

Phone: Home (____) _____ Work (____) _____

Fax: (____) _____ **Email** _____

Liner Description

Pattern: _____ **Gauge:** _____ **Bead Type:** _____

Please indicate the wall seam location

Dimensions

Width (A) _____ ft _____ in

Length (B) _____ ft _____ in

Diag#1 _____ ft _____ in

Diag#2 _____ ft _____ in

Wall Height (J) _____ ft _____ in

Depth (K) _____ ft _____ in

Shallow (E) _____ ft _____ in

Transition (N) _____ ft _____ in

Hopper Length (M) _____ ft _____ in

Up Slope (L) _____ ft _____ in

Sport End (E1) _____ ft _____ in

Left Side (G) * _____ ft _____ in

Hopper Width (H) _____ ft _____ in

Right Side (I) * _____ ft _____ in

Safety Ledge (if applicable)

Side (SL) _____ ft _____ in

End (EL) _____ ft _____ in

***Standing at the deep end ***

Your floor bottom contour determines what dimensions must be specified (see page 2).

Floor bottom contour (see page 3)
